

Appendix 3 - Carbon Emission Figures - Commuting and Working from Home

These are the carbon emission figures for different working conditions, over a period of one year.

The is partly based on FTE contract so the actual emissions are likely to be less in reality. The figures are based on 1 person commuting 1 day a week over a working year resulting in **337kgCO2e**, and 1 person working from home 1 day a week over a working year resulting in **134kgCO2e**.

	Number of staff	Number of days in the office	Commuting emissions - Tonnes CO2e	Working from home emissions - Tonnes CO2e	Total - Tonnes CO2e
Staff working from the office permanently	276	5	465	0	465
Staff wishing to work hybrid + mainly from home	1242	1	419	665	1084
	1242	2	837	499	1336
	1242	3	1256	333	1589
	1242	4	1674	166	1840
